

CHARTER OF ECO-SPORT

for sports respectful of the environment :

*During my sports activities, I also think
« Respect of the Environment »
and I adopt the 10 following simple gestures :*

- 1** I prefer carsharing, public transport or any other kind of soft transport to reach the departure line of the races and for any travel
- 2** I respect the sites: I do not trample or pick vegetation and corals
- 3** I leave nothing in the nature (papers, peelings, goblets or any other waste, even biodegradable) to avoid the proliferation of rats and keep my environment clean: I leave them at the refueling stations or I bring them at home
- 4** I respect the signs for the protection of the natural spaces, the flora and the fauna and I do not borrow shortcuts not to degrade the spaces not foreseen in the race
- 5** I sort my waste: the recyclable packaging in the yellow bin and the glass in the terminal provided for this purpose at the competition sites and at home
- 6** I use rechargeable batteries for my headlamp or any other device and reusable cups rather than disposables
- 7** I do not make fire outside the fire places fitted out for this purpose
- 8** I respect the rules of the competition, the staff responsible for its smooth running and the partners
- 9** I undertake to make my entourage aware of the eco-gestures of this charter
- 10** I promise to be an eco-citizen during my sports activities, holidays, picnics and in my leisure, on a daily basis by signing this charter
